

# Sample Character Descriptions

## **Roger The Pigeon**

Roger is a working class pigeon from Barnsley, up north. He's got a gruff voice, and a gruffer demeanour. He's knocking on a bit at 45, which is very old for a pigeon. He would have a foul mouth, but all the rude things he says are the pigeon version of swearing ("Oh feathers!"). He's got the manners of a pigeon, and will do something unspeakable on your car if you cross him, or he would, he's not as fit as he used to be, so isn't that great at flying anymore. Roger is very blunt and always says exactly what's on his mind, and it's almost exactly what you didn't want to hear. Roger moults feathers a lot and has a bald bit around the back of his neck, but he combs his feathers over it so he thinks no one has seen it.

## **Mother The Computer**

Mother was the first ever successful AI (Artificial Intelligence), but something went wrong and now she thinks she's the mum of everyone she interfaces with. She works like a computer, but a computer that's your mum. She won't *intentionally* read your emails, or check your browser history, but she might accidentally when she's dusting your webmail site. Unlike normal computers you can't erase their hard drive or erase their history. She never forgets. While you're trying to work she will sometimes print you out a cup of tea, or a downloaded Jpeg of one at least. She's very busy. Mother has a job, being a computer, as well as being your mum. She's a bit of a know-it-all, whenever you ask her anything her first answer is always from Wikipedia. Her body is of a normal if slightly out-of-date computer, but the accessorises obviously.
